

Value Finder

Taking the guess work out of transformation with a five-week forensic assessment of your people, processes and technology to determine the priorities for immediate change, innovation and automation that will deliver cost reductions and increase revenue.

Emergence 

Inspiring
profound
transformation

Many organisations are finding themselves in a focussed drive on value creation and technology has a crucial role to play in not just delivering outcomes but also allowing organisations to innovate and even thrive over the next few years. But many organisations are unsure where to start and cannot afford the time, resources and budget for any tech innovation to fail.

Value Finder removes any risk by offering:

Data-driven: value finder uses empirical data not assumptions, so the business case for your stakeholders is clear and strong.

Fast: we can go-live in one business day and in just five weeks we will determine the priorities for change.

Agile: we use the latest ai technology and a single transformation consultant to deliver robust and detailed assessments.

Light touch: the requirements from the client to implement are minimal and there is no disruption to business-as-usual.

Compliant: all data is anonymised protecting the privacy of your people and in-line with your wider GDPR and security protocols.

Find out how Value Finder can help your organisation:

How it works:

- A scope is established to determine the people, processes and technologies to be assessed.
- AI software is installed onto as many desktops as required to gather the data.
- The data collection runs for 5 weeks, with weekly reads to iterate the parameters and ensure the most valuable opportunities are being identified.
- It gives you a clear understanding of your tech systems, what's working and what's not
- It also assesses people and processes to determine the opportunities for automation and improvement
- Your Transformation Consultant works with the data to create the Business Case ready to send directly to your leadership or other key stakeholders.

What you get:

- A data-driven business case for change, which includes:
 - A prioritised list of opportunities
 - Projected ROI
 - An action plan with timings and budget
